» Collection P.O.V. brings a sense of freedom without losing order. The modular principle allows it to respond to changing needs and long-term changes, while the uniform design maintains the calm and balance of the environment. «

P.O.V. & P.O.V. PLUS COLLECTION

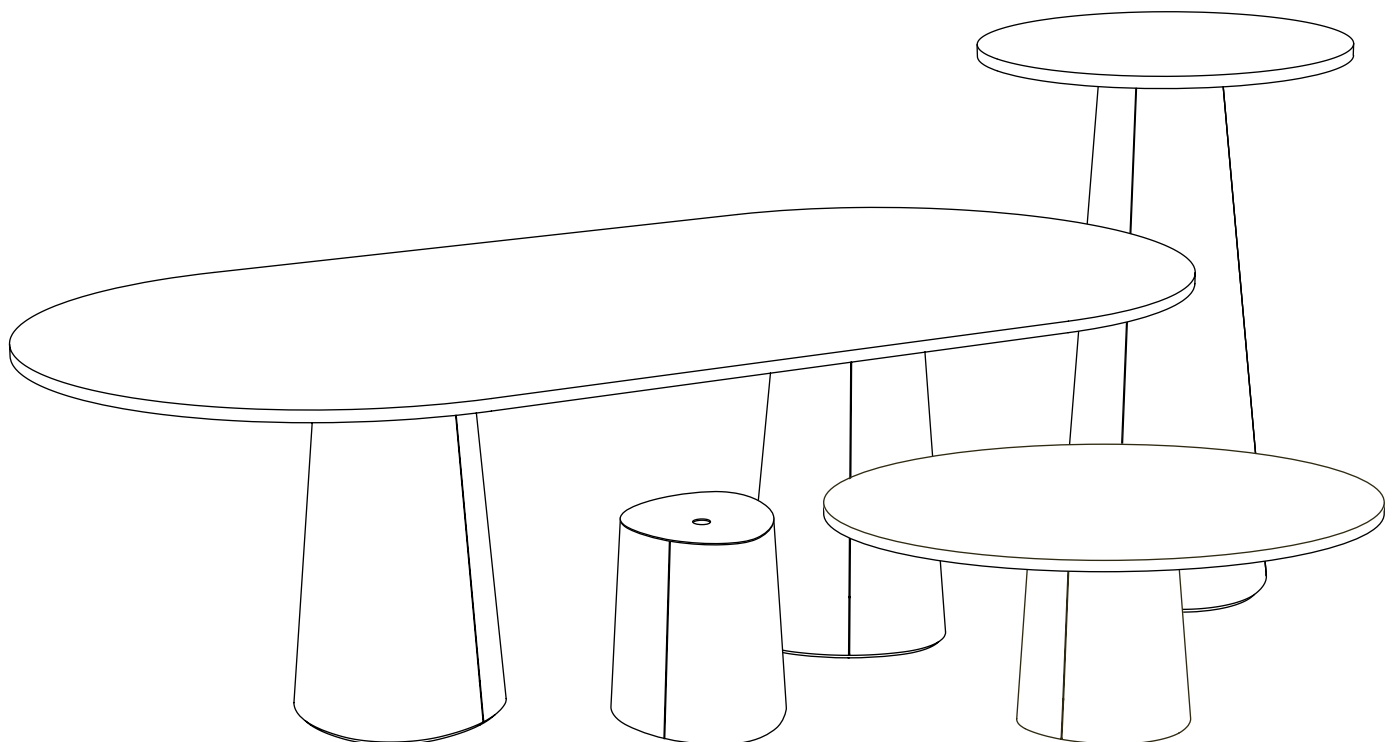

Master Of Modularity

Design KASCHKASCH (DE)

The P.O.V. tables from the KASCHKASCH studio are designed to adapt to the space and the way they are used. At first glance, they appear unobtrusive, but on closer inspection, they reveal their strength. In their details, proportions, and thoughtful variability.

The series includes conference, dining, and bar heights, three types of bases, and six tabletop shapes. The combinations create dozens of variants that are naturally suited for offices, homes, restaurants, and relaxation areas. The set can be complemented with a stackable stool with a practical trolley.

The P.O.V. plus variant takes the possibilities even further – thanks to its ingenious design, it allows for individual customization and acts as one continuous, infinite whole.

» The sophisticated design is the basis of P.O.V.'s modularity. It allows individual elements to be combined, expanded, and customized without compromising the stability or visual purity of the whole. «

KASCHKASCH (DE)

P.O.V. dining tables

They find their place in restaurants, company canteens, meeting rooms, as well as in private interiors. Thanks to a wide range of sizes and shapes, they easily adapt to different layouts and atmospheres.

Each table can be configured by combining the base and tabletop, complemented by two-tone finishes or integrated electrification. Balanced proportions, thoughtful construction, and high-quality craftsmanship ensure long-term durability in everyday use — without losing visual lightness or a timeless character.

P.O.V. dining tables are a modular solution that adapts to both the space and the way they are used. Thanks to flexible configurations and a balanced design, they can be easily combined with other Ton products to create environments for everyday gatherings.

P.O.V. design is based on dialogue, testing, and gradual refinement of details. Every decision stems from the need to combine function, construction, and visual calm into a single coherent system. From the initial sketches through prototypes to the final product, proportions, stability, and real-world usability are addressed. The result is a design that is not ostentatious, but thoughtful, understandable, and functional in the long term — designed to withstand everyday use and the test of time.

Coffee tables P.O.V.

Available in three heights, they can function independently or be combined to create balanced, dynamic arrangements. The natural wood highlights the authentic grain of the material, while the subtly pigmented shades emphasize their contemporary and distinctive character.

They are designed for both professional and private environments – from offices and lounge areas to cafés, hotels, and homes. They bring calm, balance, and an unobtrusive focal point to any space, encouraging everyday encounters and quiet moments throughout the day.

P.O.V. stool

The P.O.V. stool is designed as an inconspicuous but extremely practical element of the P.O.V. system. It serves not only as a seat, but also as a flexible accessory that naturally fits into various situations and types of spaces.

Thanks to the opening in the upper part, it is easy to carry, its lightweight construction allows for quick rearrangement, and its stackability promotes efficient use of space. Its universal shape, compact dimensions, and thoughtful design make it a useful object for everyday use—functional, versatile, and visually calm.

P.O.V. bar tables

The bar version of P.O.V. is based on the same design logic as the entire collection, but works with a different scale and rhythm. The taller proportions naturally encourage informal encounters, brief stops, and sharing on the move, while the solid base and balanced shape maintain a sense of stability and calm.

The offer also includes a hook designed for bar table variants, which allows bags or coats to be hung up. It is available in black and has a load capacity of 5 kg.

P.O.V. plus tables

These tables are designed for larger gatherings. They are ideal for restaurants, company canteens, meeting rooms, and private interiors, where they create a natural focal point.

Thanks to a wide range of sizes, shapes, and configurations – including lengths of up to 6.5 meters – they can be easily adapted to different layouts and uses. The combination of bases and table tops, the option of two-tone finishes, and integrated electrification allow you to create a solution that perfectly matches the character of the environment.

Balanced proportions, thoughtful design, and high-quality workmanship ensure durability in everyday use and a timeless look that will stand the test of time.

P.O.V. plus functions as a modular basis for various types of working environments – from reception areas and offices to canteens and conference rooms. Thanks to its versatility and generous dimensions, it adapts to different uses without losing its uniform appearance.

It offers the same qualities in each of these spaces: stability, flexibility, and thoughtful details that support everyday operations, meetings, and focused work.

Electrification options

Electrification in the P.O.V. collection expands the function of the table in a natural and unobtrusive way. Discreetly integrated modules allow you to connect technology and charge devices in various types of work situations – from presentations to everyday use in shared spaces.

The emphasis is on detail and variability of solutions: wireless charging options, various socket configurations, and multimedia connectivity adapt to the specific layout of the table and the character of the space. The result is a technical solution that supports smooth workflow without disrupting the overall expression and tranquility of the design.

electrification options.**

KASCHKASCH

KASCHKASCH is a German design studio founded in 2011 by Florian Kallus and Sebastian Schneider. Both founders, with roots in carpentry and product design, combine craftsmanship with modern technologies in their work. For Ton, they created the modular P.O.V. collection, which includes a sofa, trolley, and various types of tables, including conference, bar, and dining tables. This collection offers nearly 70 different combinations of bases and table tops, making it ideal for diverse interiors such as offices, restaurants, and cafés. P.O.V. stands out for its flexibility, simple design, and thoughtful details that combine functionality with aesthetics. Their work reflects a minimalist approach, an emphasis on sustainability, and practical use.

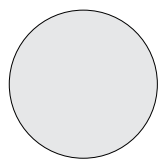

Tabletop shapes

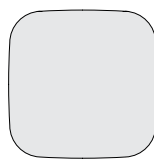

The P.O.V. collection offers a wide range of tabletop shapes to choose from. The P.O.V. plus collection is available only in oval and rectangular shapes.

Oval

Rectangle

Spherical rectangle

P.O.V. and P.O.V. plus tabletop edge shapes

P.O.V. tabletops can be fitted with rounded, bevelled, or straight edges, so you can choose between subtle elegance or refined precision—whichever best suits the character of your space. The P.O.V. plus collection is only available with rounded and beveled edges.

Rounded edge

Beveled edge

Straight edge

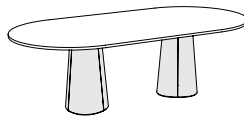

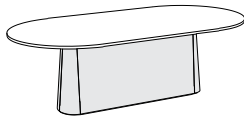

Bases

The range includes three types of bases: a single central base with a conical triangular shape, a combination of two or more of these bases depending on the table size, and a long central base. The latter two options ensure stability for larger tabletops.

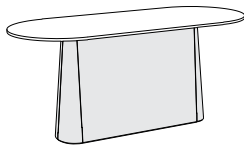

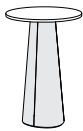

Bases are available in heights suitable for coffee tables, dining tables, and bar tables. For coffee table height, the single central base is used; for the bar version, both the single central base and the long central base can be selected.

Bicolor

A two-color combination often emphasizes the beauty and uniqueness of a product. It cannot be applied to all products and in all colors. However, the most popular combination is a base in Natural color and plywood or tabletop in a contrasting shade. Bicolor is available for selected models, marked in the price list section on the Bicolor line, at no extra charge. The P.O.V. and P.O.V. plus collections can also be made in a bicolor design, even in pigment.

Materials

At Ton, materials are chosen with care — both for their beauty and their origin. Sustainably sourced beech and oak from local forests ensure lasting quality and respect for nature.

The colour palette reflects Ton's heritage and surroundings: the deep blue of the craftsmen's uniforms, the brick red of the historic factory walls, the whites and greys of the steam from the kiln before hand bending. Every detail is thoughtfully chosen to create furniture that is timeless, responsible and deeply connected to its origins.

Wood colour swatches

Beech and oak are selected for their strength and versatility, while American walnut, available only in its natural wood finish, has rich tones and a distinctive grain. Surfaces can be left in their purest form, treated with clear lacquer or oil to retain their organic texture. Stains subtly enhance natural grain, adding depth while preserving the character of the wood, while pigment finishes create a soft, contemporary layer of colour that uniquely interacts with the structure of the wood.

This curated selection ensures a harmonious balance of authenticity, craftsmanship and contemporary aesthetics.

Coloured oils (for tables only)

The application of coloured oils is a gentle and modern technology that we primarily offer for solid wood tables where it is desirable to bring out the texture of the wood. Coloured oil is, simply put, transparent oil into which pigments are mixed to define the resulting shade. The oil is partially impregnated into the wood and partially remains on the surface of the wood. It is applied onto the surface in two layers.

After several minutes, excess oil is wiped off the finished surface. The pigments contained within the oil colour the surface and adhere to the spots that aren't smooth – pores, knots micro-tears, etc. The demands on the high quality of the manufacturing process are enormous as every scratch and fault is highlighted by the oil finish. The age of the wood or the part of the log used to make the individual segments of the joint additionally play a role. There are variations in absorbency and, therefore, oil absorption in the different directions of the wood cuts.

Wood is a natural material, so it is completely fine and authentic for its surface to be uneven and instead have a natural pattern. When the customer is inclined towards the originality of natural materials a product finished with coloured oil can be recommended to them.

Upholstery Swatches

A carefully selected range of fabrics, synthetic and natural leathers ensures durability, comfort and aesthetic harmony. The upholstery materials are divided into four fabric categories (A-D) and two leather categories, meeting high standards of abrasion resistance, pilling and flame retardancy, making them ideal for both private and public spaces.

These fabrics also comply with EU regulations and certifications such as OEKO-TEX® and the EU Ecolabel, supporting sustainable and responsible production.

History of Ton

Since 1861, the factory in the small Czech town of Bystřice pod Hostýnem has mastered the art of creating bentwood furniture, combining tradition, precision and innovation. The craftsmen of the factory transform wood into extraordinary works of art – pieces that seamlessly combine timeless elegance with modern functionality.

The choice of Bystřice pod Hostýnem as a company's home is no coincidence. This region provides access to high quality, locally sourced beech and oak – essential materials for Ton's furniture. By using sustainably harvested wood from nearby sources, Ton ensures that its products are not only beautiful, but also environmentally responsible.

Every chair, table or bench crafted by Ton carries the legacy of 160 years of craftsmanship. The company's secret lies in its unique steam bending technique, which makes it the oldest hand bending factory in the world. Here, the finest wood is transformed by skilled craftsmen into graceful, durable forms that are as practical as they are beautiful. It's this commitment to heritage and quality that makes it a name cherished by clients.

The Ton catalogue includes some of the most iconic pieces in furniture history. The legendary No. 14 Chair, originally designed in the 1850s, remains a timeless favourite, celebrated for its minimalist elegance and incredible durability.

Equally captivating are modern designs such as the Split chair, it is the only chair in the world with a seat base made from a single solid piece of wood that has been split into two parts and bent in two directions – a true testament to the mastery of our craftsmen. The Merano Chair, with its distinctive geometric lines and combination of plywood and upholstery, has become a contemporary icon, ideal for both the home and high-traffic commercial environments. Another standout is the P.O.V. collection, which offers sleek, versatile furniture tailored for the modern public place, with a perfect balance of style, comfort and functionality.

The company's attention to detail extends beyond form to its thoughtful approach to colour and materials. The fabrics and colours used in the company's products reflect the essence of the brand – timeless yet deeply rooted in its environment.

Ton is more than a furniture brand – its pieces add character, elegance and functionality to any environment. With over 160 years of heritage and a commitment to sustainable craftsmanship, the company offers timeless designs that not only enhance interiors, but leave a lasting impression.

Bystřice pod Hostýnem

1861

Classic Age Era

Michael Thonet found his second factory in Bystřice pod Hostýnem, within the former Austro-Hungarian Empire, today's Czech Republic. Thonet broke into the market with the mass production of No. 14 Chair, which he sent all around the world disassembled.

1875

Golden Age Era

Michael Thonet's sons, especially August, continued his legacy, developing the business into an empire producing thousands of products daily. The factory had nearly 2,000 employees. The golden age of the company began with No. 18 Chair in the late 1870s.

1914

Survivor Era

The First World War, followed by the Great Depression and then the Second World War, were turbulent times for the factory. The factory was merged with the biggest competitor to survive the crisis in the company. The Thonet Mundus Concern was created. Collaboration with designers such as Josef Hoffmann began, resulting in the legendary No. 811 Chair.

1945

Afterwar Era

After WW2 the factory operated under the name Thonet for eight years. Then already nationalized factory had been renamed to Ton (the Czech abbreviation for Továrna na Ohýbaný Nábytek, which means Factory for Bentwood Furniture).

1953

Eastern Block Era

Ton continued producing proven classic furniture models. Most products were exported to the former Soviet Union block. Despite difficult times, the company still strived for progressive design, producing works by designers such as Radomír Hoffman and Antonín Šuman.

1990

Open to the World Era

The newly privatized company, TON, worked diligently to reach customers in Western world and learned to withstand stiff competition of the open market. The company faced a crossroads: continue mass production or take a risk and pursue the more demanding route of high-quality design furniture. Ton chose the latter, more challenging path.

2004

Design Searching Era

Ton began collaborations with world-renowned designers such as Arik Levy or Claesson Koivisto Rune, and emerging talents like Alexander Gufler. The success of Gufler's Merano collection proved that there is a place in the market for a combination of high design and handcrafting.

2024

Future Era

With refreshed brand Ton identity we want to stay true to our history. We commit to stay the world-leading bentwood chairs and table crafters elevating the basic need of sitting to a pleasure for all senses.
